Adaptation Zone

MECCA II ALFALFA

Mecca II is an extremely non-dormant alfalfa variety developed for the low deserts of Southern California and Arizona. It has an excellent pest resistance package and proven yield performance to assure top production. Mecca II is the clear choice for top yields, particularly in areas with severe pest pressure.

- ✓ High quality alfalfa product with superior leaf-to-stem ratio.
- ✓ Very fast recovery.
- ✓ Proven high yielding variety fall dormancy of 9.
- ✓ Excellent pest resistance package for persistent stand.
- ✓ Adapted to the southwest.

Yield Comparison

Brand	Variety	Mecca II Alfalfa Percent Yield Advantage							
Dekalb	DK189	8%							
America's Alfalfa	13R Supreme	6%							
NK	Condor	2%							
WL Research	WL605	2%							
Pioneer	5929	1%							

Outstanding head-to-head yield performance versus the newest competitive varieties and technologies.
